My very important research

Name I. Last Name(s)

Abstract

This is all I could think of.

1. Introduction

I worked on some stuff.

2. Background

It was relevant stuff.

3. Related work

Other people worked on it, too, before I did, like for example Schaeffer et al. [1]. Those people are extra smart, but there are still aspects that can be improved.

4. Proposed solution

I came up with this idea.

5. Evaluation

It kinda worked.

6. Conclusions

I would like to publish this.
